1st International Symposium on Myofunctional Correction
and Cranio-Facial Development (ISMCCD)

The ISMCCD Myofunctional Symposium is a unique opportunity to experience an open forum with speakers and delegates. The conference format will be morning lectures followed by afternoon activities following a unique lunch opportunity – you will be able to “book a table” to discuss in an open forum any topic with a speaker during the lunch period. This will be a unique and additional learning experience for all. Activity times will be optional excursions where informal discussions will be commonplace. All in the atmosphere of the Gold Coast broadwater.

MORE INFORMATION

- Sea World is at the centre of everything the Gold Coast has to offer. For guests wishing to discover the Gold Coast, the resort is located close to Surfers Paradise, Jupiters Casino, Australia and Pacific Fair Shopping Centre. It is located 24km north of Gold Coast Airport and 80km south of Brisbane International Airport. For guests traveling to and from Brisbane, the Gold Coast is connected to Brisbane by a rail service.
- Includes a 20% Discount to Sea World for all conference delegates. Also, there will be a draw for an exclusive FREE Shark Bay Experience.
- For more information regarding the venue, visit: www.seaworldresort.com.au
- **Contact Ildi (+61 7 5573 5999 or ildi@myoresearch.com) for discounted accommodation packages at Sea World resort.**

3 out of 4 children have developing malocclusion

What are we doing about this worldwide problem?

1st International Symposium on Myofunctional Correction and Cranio-Facial Development

29 August – 1 September 2007

FEATURED TOPICS:

- Early recognition of the causes of malocclusion and poor facial growth.
- Treatment and Prevention.

SYMPOSIUM VENUE:

- Sea World Resort Gold Coast Australia

“We now have the research to prove early treatment is the only option.”

Dr German Ramirez, PhD

WELCOME

The majority of children can expect to grow up with a malocclusion. In every country throughout the world you see children from the age of 4 years with underdeveloped arches and early signs of crowding. **Is orthodontics using braces the cure for this epidemic?** Generally, Dental professionals say yes.

Every country has a large group of children with parents wanting more information about their child's facial and dental development. However the Dental profession and health authorities are largely unmoved by the thought of early treatment due to their confusion regarding what to treat—the teeth, the jaws, the habits, or what really matters: **the causes**. Only with a sound knowledge of what is happening can dental professionals treat anything. Orthodontics has already demonstrated a century of failure to address the problem. There remain as many patients out of Orthodontic treatment with malocclusion as there are children waiting for treatment with century-old techniques.

The ISMCCD Myofunctional Symposium will feature the leaders in the movement for change. For Decades Dr. John Mew has pushed for a change to growth guidance and Orthotropics. Dr. Chris Farrell and Dr. John Flutter have followed the philosophy into different approaches. Each conference speaker has been selected to present their unique variations on the early treatment approach.

Be ready for the change. Attend the ISMCCD .

SPEAKERS

Dr. German Ramirez (Canada)

Dr. John Flutter (UK)

Dr. Ari Masters (Australia)

Dr. Derek Mahony (Australia)

Dr. John Mew (England)

Dr. Masashi Fukuoka (Japan)

Dr. Yukio Kitafusa (Japan)

Dr. Chris Farrell (Australia)

And more to be announced...

SYMPOSIUM THEMES

This conference will explore the diverse opinion even within the speakers on the best theoretical and practical solutions.

- How to recognise early growth and development problems
- Early intervention – what to treat.
- Early treatment based oral biology
- With better faces do we need braces?
- Myofunctional Therapy and speech
- Postural aspects of malocclusion
- When to use fixed appliances – the debate
- Tongue position and function related to arch form and TM/D
- Breathing – Airway – Growth – Malocclusion
- Early class III treatment
